NUTR
 支持母乳餵哺 賦予健康新一代

“首6個月應以母乳餵哺。
有科研顯示以全母乳餵哺
可減少嬰兒患濕疹的風險。”

引錄自

支持母乳餵哺
賦予新一代健康

你與嬰兒用手接觸他的頭部

Breast-feeding is the best form of nutrition for babies and provides many benefits to babies and mothers.

It is important that, in preparation for and during breast-feeding, you have a balanced diet. Combined breast and bottle-feeding in the first few months can reduce the supply of your own breast-milk, and reversing this can be difficult. Always consult your health professional if you are having trouble about feeding your baby. If you use infant formula, always read and follow the manufacturer's instructions for use.
