MENARINI

The “**Fondazione Menarini**” was established in the spring of **1976** to promote research and knowledge in the fields of biology, pharmacology and medicine as well as economy and human sciences.

One of the main tools the Foundation uses to achieve its goals is the organization of **international congresses** with a specific focus on medical disciplines.

FONDAZIONE
MENARINI

The logo the **Fondazione Menarini** adopted at the time of its establishment derives from a famous seventeenth-century treatise, the **Novissima Iconologia del Ripa** (Ripas’ New Iconology), rich in symbolic meanings from Parmenides to Plato’s Myth of the Soul.

The image, which depicts a man leading a horse while firmly gripping the bridle, was chosen as it effectively represents the Foundation’s goals and topics based on its **balanced interests in humanistic and biological sciences**.

RATIONALE

Dear Colleagues, Distinguished Guests, and Friends,

On behalf of the Organizing Committee, it is my immense pleasure and distinct honor to extend a warm welcome to each of you as we gather for a landmark event in clinical immunology and allergy education: the inaugural Hong Kong International Allergy Summit (HKIAS).

We are incredibly proud that the Hong Kong Institute of Allergy (HKIA) has the opportunity to partner with Fondazione Menarini to co-host this first-of-its-kind international summit. By uniting our mutual dedication to medical education and research, we have curated a platform designed to bridge continents, foster transformative dialogue, and inspire breakthroughs in the field of allergy. This year is especially momentous as we proudly celebrate the 30th Anniversary of HKIA. For the past three decades, the Institute has dedicated itself to building a lasting legacy of excellence in allergy care, education, and advocacy for both Hong Kong and the broader region. There is truly no more perfect occasion than this milestone anniversary to inaugurate the Hong Kong International Allergy Summit, symbolizing both a culmination of our past achievements and a bold step into the future of global collaboration.

As you engage with our distinguished international faculty and peers from across the globe, we hope the summit will serve as a catalyst for advancing allergy science. Together, we can share cutting-edge insights, promote advancements in precision medicine, and drive initiatives that ensure optimal allergy care and access for all patients worldwide.

Beyond the summit's robust scientific program, we warmly invite you to explore the dynamic crossroads of culture and innovation that is Hong Kong, Asia's World City. Nestled at the gateway between East and West, our city offers an unforgettable backdrop for this pioneering partnership. We encourage you to take time to experience our iconic skyline, our rich cultural tapestry, and our world-renowned culinary landscape! Your presence and participation elevate this celebration of shared knowledge. We envision this summit as the essential first step in improving international, East-West collaboration in allergy, and a vital platform for long-lasting friendship and partnership. Let us seize this moment to shape the future of allergy practice together.

Warmest regards,

Prof Philip H Li
